

## Gippsland Node Julian Hill

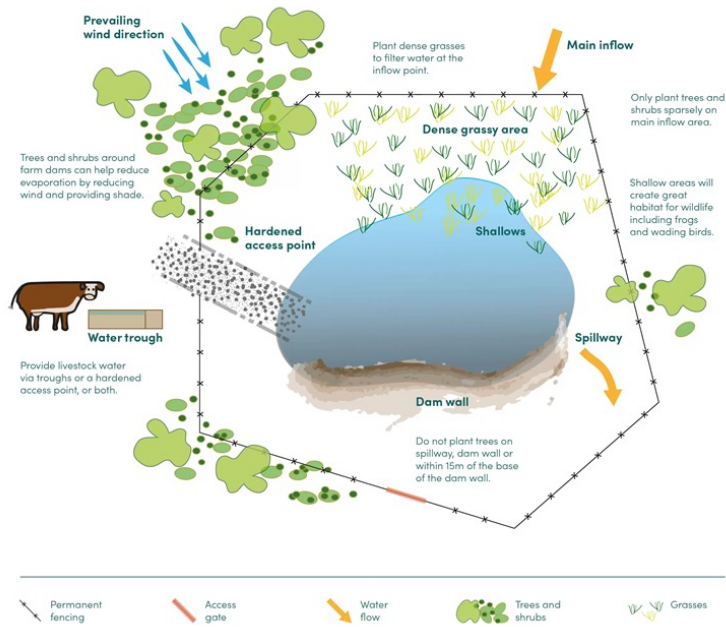

## Gippsland activities under FDF program

1. Future Fodder Project
2. Green dams
3. Irrigation networks
4. Mental health training – an agriculture train the trainer program
5. Lignite fertiliser
6. Managing droughty soils

## Green Dams Project

- **Aim of project:** improvements in water use efficiency, economic / environmental and productivity gains including implementation on farms
- **Who are the partners?** FDF Victoria hub (Deakin University/University of Melbourne), South Gippsland Landcare, Bass Coast & South Gippsland LGAs, Food & Fibre Gippsland)
- **Methodology/approach** Installation of three dam types
- **Outcomes/outputs** Best management plan for farm dams (including data from SFS Farm Dams project on catchment hydrology and water quality)
- **Who will benefit?** Farmers, extension and researchers
- **Impact** significant reflecting management of water resources classified as D&S
- **Next stage** 4 Field days, podcast and webinar series, linkages to RDC
